### Energy Management Energy Analyzer Type EM111

- · Easy connection or wrong current direction detection
- Compliant with the international accuracy standard IEC/ EN62053-21, and the IEC/EN61557-12 performance requirements (active power and active energy).
- Certified according to MID Directive (option PF only): see "how to order" below

- Single phase energy analyzer
- · Class 1 (kWh) according to EN62053-21
- Class B (kWh) according to EN50470-3
- Accuracy ±0.5% RDG (current/voltage)
- Current measurement via 333 mV current sensor up to 600 A (MV5)
- Current measurement via CT up to 300 A (AV5)
- Rated primary current: 32 A (AV7, AV8)
- Max primary current: 45 A (AV7, AV8)
- · Max cable cross section: 6 mm2
- Backlit LCD display with integrated touch key-pad
- Energy readout on display: 7 digit
- · Variable readout on display: 4 digit
- Energy measurement: kWh and kvarh (imported/exported); kWh+ by 2 tariffs
- System variables, kW, kvar, V, A, PF, Hz, kWdmd, kWdmd peak
- · Self power supply
- Dimensions: 1-DIN module
- Protection degree (front): IP51
- Pulse output (by open collector PNP)
- RS485 Modbus port
- · M-Bus port
- · Digital input (for tariff management)

#### **Product description**

Single-phase energy analyzer with backlit LCD display with integrated touch keypad. Particularly indicated for active energy metering and for cost allocation in applications up to 32 A (direct

connection) or up to 300 A (CT connection) or up to 600 A (333 mV current sensor with at least basic insulation), with dual tariff management availability. It can measure imported and exported

energy or be programmed to sum them into an unique totalizer. Housing for DIN-rail mounting, with IP51 front degree protection. The meter is provided with pulse output proportional to the active

energy being measured, RS485 Modbus port or M-Bus port.

Certified according to MID Directive, Module B and Module D of Annex II, for legal metrology relevant to active electrical energy meters (see Annex V, MI003, of MID). Can be used for fiscal (legal) metrology.

System

| Mode Selection of complete or simplified set of va  |   | Full or Easy  | Full            |
| Tariff  | Tariff enabling   | Yes/No  | No              |
| PULSE (O1 option)   | Selection of pulse ON duration  | 30 or 100 ms  | 30              |
|   | Selection of the pulse weight (multiplies of 100 pulses/kWh)  | 100 to 1000 (if duration is 100ms) 100 to 3000 (if 30 ms) | 1000            |
| Address (S1 option)   | Modbus serial address   | 1 to 247  | 01              |
| Baud (S1)   | Modbus baud rate  | 9.6; 19.2; 38.4; 57.6, 115.2<br>kbps                      | 9.6             |
| Parity (S1)   | Modbus parity   | No/even   | No              |
| Prl Add<br>(M1 option)  | M-Bus primary address   | 1 to 250  | 0               |
| Baud (M1) M-Bus baud rate   |   | 0.3; 2.4; 9.6 kbps  | 2.4             |
| RESEt   | Allow the reset of tariff meters and W dmd peak (kWh/kvarh partial meter reset available only via serial communication) | Yes/No  | No              |
| End   | Exit to measuring mode  |   |                 |

Note: after the confirmation of a new parameter value, the value is stored in the memory without the need to exit the programming mode.

#### AV7, AV8 wiring diagrams

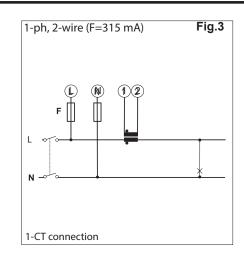

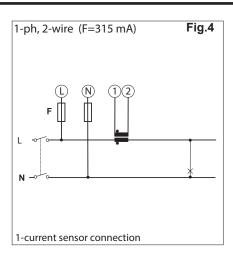

#### AV5 wiring diagrams

#### MV5 wiring diagrams

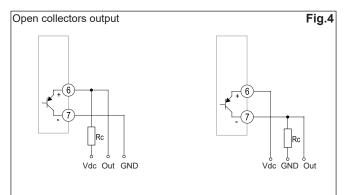

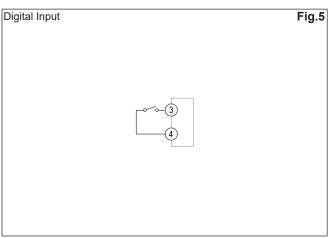

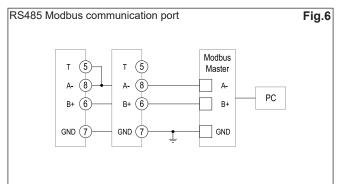

WARNING: terminals 1 and 2 are connected to live parts, use only current sensors that have, at least, basic insulation.

## Input/output communication

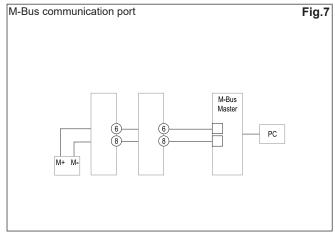

The load resistance (Rc) must be designed so that the closed contact current is under 100 mA ( $V_{\rm on}$  is equal to 1 V dc). DC voltage ( $V_{\rm off}$ ) must be less than or equal to 80 V.

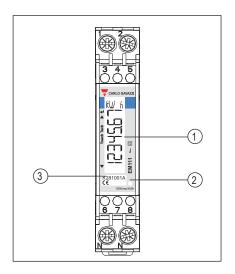

Additional instruments with RS485 are connected in parallel. The serial output must only be terminated on the last network device connecting terminals A- and T. For connections longer than 1000 m use a signal repeater. Maximum 247 transceivers on the same bus.

### Front panel description

#### 1. Display

Backlit LCD display with touch key-pad. Upper part: enter

#### 2 LFD

LED proportional to kWh reading

#### 3. Serial number and MID data

Area reserved to serial number and MID-relevant data in PF versions

### **Dimensions (mm)**
