

- Tachometer relay
- Measuring ranges:

$$
\begin{aligned}
& \text { 30-300 R.P.M. } \\
& \text { 200-2000 R.P.M. } \\
& 1000-10000 \text { R.P.M. }
\end{aligned}
$$

- Knob-adjustable set level
- Controlled by Namur/DIN 19234 sensor or metallic contact
- Connection for moving-coil instrument
- 10 A SPDT output relay
- LED indication for relay ON
- AC or DC power supply

## Product Description

SM155 monitors the actual RPMs of a motor by a Namur/DIN 19234 sensor or a metallic contact.

Knob adjustable set level on relative scale.

## Type Selection

| Plug |  | Output |  |
| :--- | :--- | :--- | :--- |

| Input |  |
| :---: | :---: |
| Through terminals: |  |
| Metallic contact: | 5, 6 |
| Namur sensor: | 6, 7 |
| Measuring ranges |  |
| Types: |  |
| 300: | 30 to 300 R.P.M. |
| 2K: | 200 to 2000 R.P.M. |
| 10K: | 1000 to 10000 R.P.M. |
| Inversion | Interconnecting pins 8, 11 |
| Short circuit current |  |
| Pins 5, 6 | 5 mA |
| Pins 6, 7 | 10 mA |
| Connection cable Max resistance | Can be extended as desired $100 \Omega$ |
| Hysteresis | approx $3 \%$ of set value |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

| Supply: 115 VAC | Supply: 230 VAC | Supply: 24 VDC |
| :---: | :---: | :---: |
| SM 155115300 | SM 155230300 | SM 155724300 |
| SM 155115 2K | SM 155230 2K | SM 155724 2K |
| SM 155115 10K | SM 155230 10K | SM 155724 10K |

## Output Specifications

| Output | SPDT relay |
| :---: | :---: |
| Instrument connection | Connection for moving-coil instrument |
| Through pins | 8, 9, pin 9 positive |
| Full scale deflection | 1 mA |
| Internal resistance | $110 \Omega$ |
| Rated insulation voltage | 250 VAC |
| Contact ratings (AgCdO) | $\mu$ |
| Resistive loads AC 1 | 10A, 250 VAC |
| DC 1 | 1 A, 250 VDC |
| Small inductive loads AC 11 | 2.5 A, 230 VAC |
| DC 11 | 5 A, 24 VDC |
| Mechanical life | $\geq 30 \times 10^{6}$ operations |
| Electrical life | $\geq 2.5 \times 10^{5}$ operations (at max load) |
| Operating frequency | $\leq 7200$ operations/h |
| Dielectric strength |  |
| Dielectric voltage | $\geq 2 \mathrm{kVAC}$ (rms) |

## Supply Specifications

## General Specifications

| Reaction time | Time between 2 pulses at <br> the set value of the poten- <br> tiometer |
| :--- | :--- |
| Accuracy of measurement | $\pm 3 \%$ |
| Indication for <br> Power supply ON <br> Output relay ON | LED, green <br> LED, red |
| Environment <br> Degree of protection <br> Operating temperature <br> Storage temperature | IP 20 |
| Housing dimensions | -20 to $+50^{\circ} \mathrm{C}$ |
| Weight <br> AC power supply <br> DC power supply | $35 \times 80 \times 85^{\circ} \mathrm{C} \mathrm{mm}$ |
| Approvals | Approx. 200 g |
| CE Marking | Approx. 125 g |

## Mode of Operation/Level Setting

The relay is controlled by mechanical triggering, e.g. microswitch, reed relay, limit switch etc. (examples 1 and 2), or by electronic triggering, e.g. inductive or capacitive sensors (NAMUR/DIN 19234) (examples 3 and 4).

## Examples 1 and 3

The relay operates when the number of R.P.M. exceeds the set value.

The relay releases when the number of R.P.M. is less than the set value. See hysteresis.

## Example 2 and 4

By interconnecting pins 8 and 11 the relay function is inverted, i.e. the relay releases when the number of R.P.M. exceeds the set value.
The relay operates when the number of R.P.M. is less than
the set value. See hysteresis. Instrument connection
A moving-coil instrument with a scale calibrated in R.P.M. can be connected to the SM 155. The instrument has 1 mA full scale deflection.
The relay generates max. 8.2 V on the instrument terminals (pins 8 and 9) across an internal resistance of $8.2 \mathrm{k} \Omega$ in the relay. The ideal interna
resistance of the instrument is $110 \Omega$. A deviation in the internal resistance of $\pm 100$ $\Omega$ results in an error of $\pm 1 \%$.
